Nautilus
Training Alliance

NAUTILUS TRAINING ALLIANCE (NTA)

Programme of competency based training courses for subsurface professionals delivered by expert tutors.

History

- Nautilus created the Training Alliance in collaboration with oil and gas companies in 1998 to develop a programme of training courses in petroleum geosciences, reservoir and production engineering.

Quality Assurance

- A thorough quality assurance and feedback process, supported by periodic external review, ensures courses of the highest quality.

Expert Tutors

- We have built up a portfolio of over 400 courses delivered by tutors who are subject matter experts as professional practitioners with many years of experience or academics with cutting-edge knowledge of the subject areas.

Comprehensive Technical Portfolio

- A wide range of professional training courses in topics across the energy industry. Courses are framed within a competency matrix of subject areas and skill levels: learning outcomes for each course are defined to ensure participants meet training objectives.

Field-Based Training

- Unrivalled selection of field-based training courses in North America, Canada, Europe, that combine visiting outcrops with classroom-based study to provide participants with a unique learning environment.

Courses and Workshops

- Classroom events ranging from one day focussed workshops to one week courses delivered in North America, Europe, Australia and the Asia-Pacific region.

Enhanced Learning - 3D Outcrop Models

- 3D outcrop models are incorporated into classroom and field courses. These provide a means of displaying geological features seen in outcrop, in a more detailed, interactive way, allowing both the tutor and the participants to better visualise key sedimentological, stratigraphic and structural elements.

This schedule lists the NTA courses that are planned for 2019. Courses are listed by Subject Area and in date order, and is intended as a guide only. We anticipate adding a selection of courses to the NTA programme over the next few weeks, dates will be confirmed as soon as possible.

For full course details and latest availability please view - <http://training.rpsgroup.com>.

Alternatively, please email energytraininginfo@rpsgroup.com for the latest information.

Please ensure that when booking on an NTA course that participants allow sufficient travel time either side of the course dates shown. All course locations and dates are subject to change.
